Description

The HD8 and HD10 Defenders can pull at the top of their class with a towing capacity of 2,500-lbs (1,134 kg). A reinforced, automotive-like high-strength, low-alloy (HSLA) grade steel chassis is purpose-built to handle the strain of heavy-duty jobs. From surviving Defender Challenge test drives to our brutal Utility Test Cycle, it's clear we've built it tough for every situation you'll face.

The Defender heavy-duty Torsional Trailing A-arms (TTA) was designed specifically for a utility and recreational usage, offers a full 10-in. (25.4 cm) of travel to provide a smooth ride whatever the terrain. Its architecture offers an optimal comfort and drivability in all conditions thanks to no camber.

The VERSA-PRO Bench Seat is engineered as a 40/20/40 bench seat, inspired by modern pick-up trucks. It can comfortably accommodate three adults and features "profiled" corners to improve entrance / exit of the cab as well as a sturdy vinyl cover for improved wear resistance. The passenger seats, complete with integrated hooks on their underside, also can be flipped up to improve onboard storage. Can-Am designers also added a foldable central console and armrest with two cup holders to allow more space in the cab.
